

No	name	research or case	title
P-1	H. Eto	original research	Generation and characterization of mesenchymal stem cells from affected femoral head of the dogs with Legg Calvé Perthes disease
P-2	M. S. Purba	original research	Establishment of laminated fibroblast cell sheets from the oral mucosal of dogs
P-3	B. Kim	case report	Interventional thrombectomy using Solitaire® stent in a cat with cardiogenic aortic thromboembolism
P-4	J. Choi	original research	Distribution of 18F-fluoro-2-deoxy-D-glucose of normal canine ovaries in positron emission tomography/computed tomography
P-5	Seungyeon Yu	original research	Recurrent skin opening induced by chronic sternal osteomyelitis caused by a bite wound in a cat
P-6	N. Monkong	case report	Laparoscopic ureterectomy for ureteral remnant resection in a canine patient
P-7	Jianjun Li	case report	Thoracoscopic treatment of one case of idiopathic chylothorax in cats
P-8	Hyungmin Seo	case report	Pyothorax induced by an intrathoracic foreign body in a miniature dachshund: Migration of a popsicle stick from the stomach.
P-9	A. Yokoi	case report	Suspecting idiopathic pulmonary lobe torsion in a cat: a case study
P-10	M. Suematsu	original research	Outcomes of continuous extraluminal tracheal prosthesis placement in 170 dogs with goose honking of tracheal collapse.
P-11	Kim Hyeonho	case report	Surgical resection of Renal cell carcinoma invading caudal vena cava in a dog
P-12	Narae Lee	case report	Case report : Giant Multiloculated Pseudocystic Jejunal Leiomyosarcoma in a Dog : Atypical Morphologic Features of Canine Intestinal Leiomyosarcoma
P-13	K. Kurogochi	case report	Sequential Surgical Interventions for Myxomatous Mitral Valve Disease and Pulmonary Adenocarcinoma in a Dog: A Case Report
P-14	Bokyung Song	original research	MRI-Based prediction of recurrent sites in canine thoracolumbar intervertebral disc extrusion
P-15	Jaegwan Cha	case report	A Novel Surgical Approach for Canine Lateral Skull-Base Tumors
P-16	Hwajeong Shin	original research	Effect of high radial osteotomy on frontal plane thoracic limb alignment: An in vivo canine study
P-17	Y. J. Chen	original research	Development of a Customized Two-dimensional Kinematic Analysis Device for Hindlimb Gait Analysis in Dogs
P-18	Donggeon Shin	original research	Comparative analysis of tibial alteration after three CCWO techniques in toy breed dogs: radiographic simulation assessment
P-19	Tsai-Yu Lee	original research	Patient-specific anatomic reconstruction of canine cranial cruciate ligament using an adjustable aiming device
P-20	Heesoo Ahn	case report	Evaluating post-rehabilitation canine hind limb muscle activity: 18F-FDG PET/CT analysis after stair climbing
P-21	D.F. Ma	case report	Case report: UHMWPE strand implantation in a CCRL and IV degree MPL dog
P-22	Hyunsoo Kim	original research	A novel shape memory alloy method for Vancouver type B1 periprosthetic femoral fracture in beagles
P-23	Byoungho An	case report	A comprehensive postoperative long-term review of suspected osteogenesis imperfecta: in two cases
P-24	D. Anggoro	original research	Elucidation of the radius and ulna fracture mechanisms in toy breed dogs using finite element analysis
P-25	Wang, Li-Ren	case report	Cystoscopic-guided laser ablation of ectopic ureters in a male dog with tentative perineal urethrotomy
P-26	N. Darayen	case report	Successful resolution of acute kidney injury from iatrogenic bilateral ureter ligation in a cat managed with peritoneal dialysis: A case report
P-27	S. Tiwaporn	case report	Idiopathic osteonecrosis of jaw: a case report
P-28	S.Pattanasittiseree	case report	Bronchoscopy in dog with pulmonary aplasia in a dog
P-29	P. Lewchalermwong	case report	Scrotal migration of a ventriculoperitoneal shunt in dog
P-30	Choi.DY		Algometer-based study on back pain in dogs with patellar luxation
