

December 8th (Friday) Oral Ssession Program

	time	start	name	title	chair person
O-1	10min	13:30	Kiew Lik Jun	The “Luca Omodeo” Modification in Patella Groove Replacement Procedure	1
O-2	15min	13:40	Sungbeen Park	Evaluation of minimally invasive plate osteosynthesis using 3-dimensional printing technology for stabilization of radial fractures in dogs: a cadaveric study	1
O-3	10min	13:55	Suttida Thongin	Fracture management of the distal tibia and fibula using locking plate and conventional plate osteosynthesis in a Mandrill Monkey (Mandrillus sphinx)	1
O-4	10min	14:05	Benchapol Lorsunyaluck	Adaptation of sterile disposable injection needle in tiny parrot’s orthopedic surgery	1
Break (10min)					
O-5	15min	14:25	Yeowool Seon	A shape memory alloy implant can be an effective surgical treatment in the atlantoaxial joint stabilization using rabbits as substitutes for toy-breed dogs	2
O-6	10min	14:40	Yongsun Kim	Application of electromagnetic neuronavigation for intraventricular catheter placement in small-breed dogs	2
O-7	10min	14:50	Narae Jeong	Customized 3D-printed model assisted surgery of intracranial meningioma in 3 dogs and 2 cats	2
O-8	10min	15:10	Kenta Sasaki	Surgical correction of Cor triatriatum dexter under cardiopulmonary bypass in a dog	3
O-9	10min	15:20	Shigeharu Semba	Surgical resection under cardiopulmonary bypass for right atrial myxosarcoma in a dog.	3
Break (10min)					
O-10	10min	15:40	Supaporn Numpadit	Surgical treatment of canine orbital meningiomas: A review of 4 cases	4
O-11	15min	15:50	Yosuke Takahashi	Retrospective study of outcomes and prognosis of 33 cats with peritoneopericardial diaphragmatic hernia	4
O-12	10min	16:05	Benedict Ong Huai Ern	The effect of subcutaneous injection of low dose xylazine at the Yin Tang acupoint in cats	5
O-13	15min	16:15	Shintaro Tomura	Feasibility of ACTH stimulation test at six hours after adrenalectomy in dogs	5
Break (10min)					
O-14	15min	16:40	Ming-Ru Huang	Trans-Hepatic Arterial Embolization (TAE) for Unresectable Hepatocellular Carcinoma in Dogs: Efficacy, Complications, and Prognostic Indicators	6
O-15	10min	16:55	Yi-Fu Chang	Acute bilateral femoral arterial thrombosis in a dog: Successful recanalization with the use of thrombolytic agent and the modified Seldinger technique	6
O-16	10min	17:05	Sakiyo Iketani	Chylothorax associated with thrombosis of the left brachiocephalic vein in a dog	7
O-17	15min	17:15	Hiroo Kanai	En bloc thoracic duct ligation by video-assisted thoracoscopic surgery for canine idiopathic chylothorax in three dogs	7
O-18	10min	17:30	Dognmin Sihn	Surgeon-powered robotics in laparoscopic surgeries in dogs : after a year of experience.	7
Break (10min)					
O-19	10min	17:50	Sang-Yoon Shin	Use of double-wire woven nitinol uncovered biliary stent for management of dogs with extrahepatic biliary duct obstruction secondary to pancreatitis	8
O-20	15min	18:00	Changhwan Moon	Common bile duct reconstruction using autologous vessel graft with 3D-printed biodegradable biliary stent in dogs	8
O-21	10min	18:15	Chieh-Jen Cheng	Long-term survival of a cat with duodenal peripapillary adenocarcinoma treated by total en bloc resection with gastroenterostomy by Billroth II and Braun anastomosis followed by reconstruction of pancreatic and common bile ducts	8
