

Chairperson	Start time	No	Presentation time	Title of abstract	Name of presenter	Category
<b>13:00 Day 1 Start</b>						
Byung-Jae KANG	13:00	1	10	Minimally invasive unilateral biportal endoscopic approach for thoracolumbar intervertebral disc herniation in dogs	YONGSUN KIM	Clinical Case Session
	13:10	2	10	Cervical intervertebral disc disease in 307 small-breed dogs (2000–2021): A novel concept of intervertebral disc degeneration and associated instability stage	Takeshi Aikawa	Original Research Sessi
	13:20	3	10	Management of medial luxation of the shoulder joint in toy-breed dogs using an antiluxation pin placed lateral to the supraspinatus muscle tendon: 20 limbs (2017–2022)	Takeshi Aikawa	Original Research Sessi
	13:30	4	10	Enhancing the accuracy of pedicle screw placement using a modular 3D-printed screw-guiding techniques in the lumbosacral region for small breed dogs: A cadaveric study	Jinyeong Kim	Original Research Sessi
	13:40	5	10	Evaluation of synovial gene expression in spontaneous canine osteoarthritis and generation of an in vitro canine synovitis model	Atsushi Yamazaki	Original Research Sessi
<b>13:50-14:10 20 min break</b>						
Kazuya EDAMURA	14:10	6	15	Biomechanical assessment and comparison of fixation methods for bilateral sacroiliac joint luxation in 3D-printed feline pelvic bone models	Chaiyakorn Thitiyanaporn	Original Research Sessi
	14:25	7	15	Targeting tie-2 receptor with rebastinib (DCC-2036) for angiogenesis inhibition in early-stage arthritis: enhanced efficacy through liposomal sustained release	Minuk Jeong	Original Research Sessi
	14:40	8	10	Cadaveric study of pressure mapping in small dogs : assessing lateral fabello-tibial suture technique with an assistant device for cranial cruciate ligament rupture	Geonil Moon	Original Research Sessi
	14:50	9	10	The Use of Calcium Sulfate Antibiotic Beads and BMP-2 mixed with HA/Allograft treated both of Osteomyelitis and Nonunion in Dog	Hyobum Cho	Clinical Case Session
<b>15:00-15:20 20 min break</b>						
Atushi FUJITA	15:20	10	10	Caudal lateral approach for the total ear canal ablation and lateral bulla osteotomy in two French bull dogs.	Yusuke Ozai	Clinical Case Session
	15:30	11	10	Postoperative sliding hiatal hernia in cats following diaphragmatic hernia repair: proposing a left gastropexy as a preventative strategy	Aujcharyaporn Phongphuwanan	Clinical Case Session
	15:40	12	15	Surgical outcome of hepatic mass originated from papillary process of caudate lobe in dogs	Takeshi Hayakawa	Original Research Sessi
Satoshi TAKAGI	15:55	13	10	The clinical outcomes of perineal herniorrhaphy in conjunction with prostatic disease management and castration: retrospective study	Putinee Sangmanee	Original Research Sessi
	16:05	14	10	Outcomes of extravesicular, single-layer, side-to-side ureteroneocystostomy without temporary ureteral catheter in 15 cats with ureteral obstruction	Sakiyo Iketani	Clinical Case Session
	16:15	15	15	Upregulation of klotho-beta expression in canine transitional cell carcinoma and its prognostic significance	Si Eun Lee	Original Research Sessi
<b>16:30-16:50 20 min break</b>						
Inhyung LEE	16:50	16	10	Successful salvage from ventricular fibrillation during thoracoscopic pericardiectomy in 2 dogs	Kumiko Ishigaki	Clinical Case Session
	17:00	17	15	Utilizing the VetEase device-novel cryoanesthesia in 90 cases of dogs as a pain management too	Narae Lee	Original Research Sessi
	17:15	18	15	Is alfaxalone truly equivalent to propofol? A functional MRI study.	Kanako Muta	Original Research Sessi
Kyoung-a YOUP	17:30	19	10	Three Cases of Atrial Septal Defect (ASD) Treated with the Amplatzer Canine Duct Occluder	Ryuo Tanaka	Clinical Case Session
	17:40	20	15	Preoperative prediction models for 30-day mortality after mitral valve repair in dogs	Shimon Furusato	Original Research Sessi
	17:55	21	10	Concurrent Lobectomy and Mitral Valve Repair in Two Dogs	Asako Shinoda	Clinical Case Session
Lina HAMABE	18:05	22	10	Complete Resolution of Mitral Regurgitation in 3 Cases of MMVD Stage B2 and C After TEER Surgery	Kyounga Youp	Clinical Case Session
	18:15	23	10	Outcomes of transcatheter edge to edge repair surgery to manage myxomatous mitral valve disease stage D in 5 dogs.	Kyounga Youp	Clinical Case Session
<b>18:25 Day 1 End</b>						
<b>9:00 Day 2 Start</b>						
Hiroo KANAI	9:00	24	10	Laparoscopic partial pancreatectomy with lymphadenectomy in dogs: a case series report	Dmitriy Neginskiy	Clinical Case Session
	9:10	25	15	Efficacy of 3D laparoscopy combined with articulating instruments for intracorporeal suturing in veterinary surgery	Dongmin Sihn	Original Research Sessi
	9:25	26	15	Managing Hypercapnia in Large Breed Dogs During Abdominal Laparoscopic Surgery: Determining Optimal Ventilatory Driving Pressure—Preliminary Results Of A Prospective Clinical Study	Francis Jongwoo Park	Original Research Sessi
Kenji HOSOYA	9:40	27	15	A Comparison of Non-elective and Elective Laparoscopic Cholecystectomy Outcomes in Dogs with Gallbladder Disease	Hiroo Kanai	Original Research Sessi
	9:50	28	10	Laparoscopic Ligation of Feeding Arteries for Unresectable Liver Tumors: A Minimally Invasive Therapeutic and Diagnostic Approach	Suntae Lee	Clinical Case Session
<b>10:10 15 min break</b>						
Hun-Young YOON	10:25	29	15	Indocyanine green near-infrared fluorescence guided sentinel lymph node biopsy for canine mammary tumor patients: feasibility and optimization	SEUNGWOOK KIM	Original Research Sessi
	10:40	30	10	Prognostic impact of immune cell infiltration in canine oral malignant melanoma treated with anti-PD-L1 antibody therapy	Shintaro Kamo	Original Research Sessi
	10:50	31	10	Feasibility of Endo GIA™ stapler for lung lobectomy via lateral thoracotomy in cats	Shintaro Tomura	Original Research Sessi
<b>11:00 Day 2 AM End</b>
